

**Secretary:** Jessi Rouda is a non-traditional student with Colorado State University Online working towards a Masters in Fish, Wildlife, and Conservation Biology. She is currently working full-time for Idaho Power Company as a lead Science Technician in their environmental department in the White Sturgeon Program. She has been with this company for 6 years and works with all things White Sturgeon including the conservation hatchery program, young-of-year and recruitment assessments, and adult population surveys. She works on the Snake River from Twin Falls To Lower Granite Reservoir in Washington.
